Specification animal fat  
Kat3  
Max. 10%

**Product: Animal fat Kat3**

<b>Manufacturer:</b>	Berndt GmbH Hauptstraße 2-4 D-85445 Oberding										
<b>Animal feet:</b>	Animal fat										
<b>Product Description:</b>	Animal fat is an energy source that derived from animal Byproducts of Category 3 is produced. The product is specifically suitable for further processing in oleochemicals technical Uses or as starting product for the preparation of Feed. (= Positive list of feed materials 19:04:01) The product must not be used for feeding to ruminants!										
<b>Information of the manufacturing process:</b>	The fresh by-products are visually inspected and crushed. After then, the heating, drainage, pressing and cleaning of animal fat is following. The manufacturing process is in accordance with Methode 7, Chapter 3, Annex V, EG 1774/2002. The critical control points shredding, temperature and dwell time are continuously collected and recorded.										
<b>Indications for use of Auxilliary and aggregates:</b>	There are no auxilliary and aggregates used.										
<b>Constituents:</b>	<table> <tr> <td>- ffa</td> <td>max. 10 %</td> </tr> <tr> <td>- Sediment</td> <td>&lt; 0,15 %</td> </tr> <tr> <td>- Salmonellae spp. in 25g</td> <td>negative in 25 grams</td> </tr> <tr> <td>- Clostridium perfringens KbE/g</td> <td>1</td> </tr> <tr> <td>- Enterobacteriaceae KbE/g</td> <td>&lt; 10</td> </tr> </table>	- ffa	max. 10 %	- Sediment	< 0,15 %	- Salmonellae spp. in 25g	negative in 25 grams	- Clostridium perfringens KbE/g	1	- Enterobacteriaceae KbE/g	< 10
- ffa	max. 10 %										
- Sediment	< 0,15 %										
- Salmonellae spp. in 25g	negative in 25 grams										
- Clostridium perfringens KbE/g	1										
- Enterobacteriaceae KbE/g	< 10										
<b>Reference value (Last output)</b>	<p><b><u>Extract of the last complete analysis:</u></b></p> <table> <tr> <td>- ffa</td> <td>&lt; 8,0 %</td> </tr> <tr> <td>- Sediment</td> <td>&lt; 0,1 %</td> </tr> <tr> <td>- Water</td> <td>&lt; 1,0 %</td> </tr> </table>	- ffa	< 8,0 %	- Sediment	< 0,1 %	- Water	< 1,0 %				
- ffa	< 8,0 %										
- Sediment	< 0,1 %										
- Water	< 1,0 %										
<b>Information on the durability and Storage:</b>	The expiry date of animal fat can be extended if stored correctly. Oxidation should be prevented – low temperature, no aeration, preferably dark storage in closed bulks.										
<b>Shelf-life:</b>	At least 3 months when properly stored.										
<b>Safety Instructions:</b>	Animal fat is non-toxic, biodegradable product - no safety precautions.										
<b>Notes of critical ingredients:</b>	Category 3 material is not allowed for human consumption. The transport container must be labeled accordingly: KAT3 "not for human consumption"
